Important

Medical Emergency Notice

If you are experiencing a medical emergency — including sudden vision loss, eye trauma or chemical exposure to the eye — call 911 or go to the nearest emergency room immediately. Do not use this website, email or our online contact form to seek emergency care. These are not monitored continuously and are not appropriate for urgent situations.

General Information Only

The content on this website, including text, graphics, images and other material, is provided by California Vision and Visage for general informational purposes only. It is not intended to be, and should not be treated as, a substitute for professional medical advice, diagnosis or treatment. Always seek the advice of your ophthalmologist, physician or other qualified health provider with any questions you may have regarding a medical condition, and before starting, stopping or changing any treatment.

No Doctor–Patient Relationship

Use of this website, submission of a contact or appointment request form, or email correspondence with our office does not create a physician–patient relationship between you and California Vision and Visage or any of its providers. A physician–patient relationship is established only after you have been formally accepted as a patient and have had an in-person — or, where appropriate, telehealth — evaluation consistent with our office's intake procedures.

No Warranty as to Accuracy

While we strive to keep the information on this website accurate and up to date, we make no representations or warranties of any kind, express or implied, about the completeness, accuracy, reliability, suitability or availability of the information, products, services or related graphics contained on this website. Medical knowledge and best practices change over time, and any reliance you place on such information is strictly at your own risk.

Individual Results May Vary

Any before-and-after photographs, patient testimonials or descriptions of procedure outcomes — including, where applicable, cataract surgery, refractive procedures, or treatment of retinal, corneal or eyelid conditions — are provided for illustrative purposes only. Individual results vary based on each patient's unique anatomy, health history and other factors, and no specific outcome is guaranteed.
